

Deburring & finishing machines - DSM - HM

The DSM Deburring & Finishing Machines are abrasive belt sanders for grinding of metal surfaces after for example laser cutting.

Model DSM is available with either a grinding width of 650mm or 1100mm and for parts up to 130mm thickness.

The thickness of the material is easy adjusted from the front of the machine with digital readout. The wide grinding belt is controlled by a pneumatic system which ensure the right tension and alignment of the belt.

The parts are transported through the machine by a special conveyor belt with a super grip profile. The feeding speed of the conveyor belt can be adjusted from 2-10 m/sec.

DSM 650E

Item Number: 14200000

Conveyor belt speed (m/sec.)	2 - 10
Grinding belt (mm)	670x1524
Machine height (mm)	1828
Machine length (mm)	1105
Machine width (mm)	1180
Net weight (kg)	500
Plate width (mm)	650
Sheet thickness (mm)	0,5 - 120
Table height (mm)	950
Working width (mm)	650

DSM 1100E

Item Number: 14200005

Conveyor belt speed (m/sec.)	2 - 10
Grinding belt (mm)	1120x1524
Machine height (mm)	1828
Machine length (mm)	1620
Machine width (mm)	1180
Net weight (kg)	800
Plate width (mm)	1100
Sheet thickness (mm)	0,5 - 130
Table height (mm)	950
Working width (mm)	1100
